Kamlesh Jambani

Msc in Computer Science From University of Galway | Ex- Software Engineer @Merkle Inc | Machine Learning | Data Science | AI Engineer

Galway, County Galway, Ireland

Summary

Software developer with a blend of full-stack and data analysis expertise. At Merkle Inc., I contributed to both front-end (AEM) and back-end development, including building Node.js servers and integrating with AWS services. My passion for data led me to pursue an MSc in Computer Science, Data Analytics at the University of Galway, where I'm expanding my skills in machine learning and statistical analysis. Eager to apply my diverse skillset to solve complex problems with technology.

Experience

University of Galway School of Computer Science

Teaching Assistant

October 2024 - April 2025 (7 months)

Galway

Technical Mentorship: Provided real-time debugging and complex problem resolution for 60+ students in lab environments, focusing on Python programming and advanced Java infrastructure.

Quality Assurance & Standards: Evaluated and corrected technical assignments to ensure student code adhered to industry-standard clean code practices, fundamental logic requirements, and best practices.

Knowledge Synthesis: Translated intricate computing and networking concepts into digestible technical lessons, facilitating a structured learning environment for diverse groups of learners.

Merkle

Associate Software Developer

July 2021 - July 2023 (2 years 1 month)

Thane

Backend Engineering:

AWS Automation: Developed a scalable Node.js server integrated with AWS Lambda, API Gateway, and S3 to automate CSV-to-JSON conversion, handling 10k+ records weekly.

Database Pipeline: Engineered Python scripts to automate data extraction from Aurora MySQL to S3, ensuring consistency and reducing manual overhead by 70%.

Analyst/Consultant:

Interactive Dashboards: Leveraged the Qualtrics platform to design interactive dashboards for vaccine distribution, providing real-time insights into demographics and geographic trends.

API Management: Implemented RESTful APIs on Qualtrics to efficiently retrieve and manage JSON data, optimizing survey logic and data reliability.

Stakeholder Relations: Facilitated communication with non-technical stakeholders to translate complex data findings into actionable business insights.

AEM Full Stack:

Adobe Experience Manager (AEM) & Frontend

AEM Development: Played a key role in developing and maintaining AEM-based websites for 3+ global clients, building custom CQ5 templates, components, dialogs, and widgets.

Backend Integration: Developed OSGi bundles and services within AEM components and configured custom workflow steps for seamless enterprise implementation.

Quality Assurance: Engineered unit tests using JUnit to validate OSGi services, ensuring 100% logic accuracy for mission-critical client integrations.

Success Mantra Foundation

Web Development Intern

August 2020 - October 2020 (3 months)

- Developed responsive web pages, improving user engagement by 25%.
- Integrated third-party APIs to enhance website functionality.
- Optimized website performance, decreasing page load time by 30%.
